## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 20 August 2007 has been entered.

### ***Allowable Subject Matter***

2. Claims 1-2 and 4-18 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claims 1 and 10, the prior art of record neither shows nor suggest a high pressure discharge lamp comprised of, in part, with an asymmetrical discharge space, whereby the discharge space has a volume which is reduced by a given first factor in comparison with the volume of the discharge space in that a quantity of light-generating substances in the discharge space is reduced by a second factor which is determined in dependence on a value of the, first factor and on the distance, defined by the asymmetry, of the electrodes to the bottom surface that is lowermost in the in the operational position of the lamp, along with the rest of the limitations of the claim(s).

Due to their dependency, claims 2, 4-9, and 11-18 are necessarily allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
